**AUDITORS REPORT TO THE GOVERNING MEMBER OF PROJECT  
TERRA FIRMA**

**Details:**

Sl. No.	Particulars	Remarks
1.	Audit Team	Shyam S
2.	Audit Date	05.10.2018
3.	Schools Visited	- Mangala HPS - Kannur Hatti - Hanur HPS

We have visited the above schools and conducted the audit as per the engagement. Detailed observations have been annexed to this report.

**Key Feedbacks:**

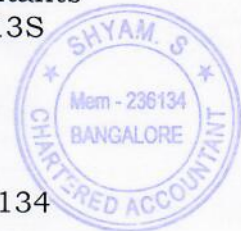

1. We suggest a detailed list of inventories be made by each school before any procurements. This will reduce the expenditure/ wastage of materials.
2. As suggested last years a register has been maintained giving a brief calculation of the receipts and payments along with the supporting bills attached to the same for every month and same has been verified during my visit.
3. We suggest that the science experiments under each module be revised every year. This will help to retain the interest of the students who are selected each year for the same programme.
4. Art Programme should identify drawings to be taught under each module based on the syllabus of class 4-8<sup>th</sup>. This will be relevant for their studies. Completion of all the modules would be difficult, as only 3 months of the current academic year is remaining. We suggest taking stock of the modules completed and revise the syllabus to suit the time available.
5. Art books distributed to the students are also used for practice. We suggest to used old/ loose leaves sheets for practice, this will reduce the wastage of art materials.

Principle

Archimedes' principle states that

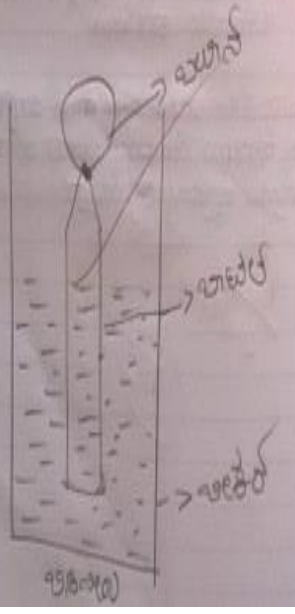

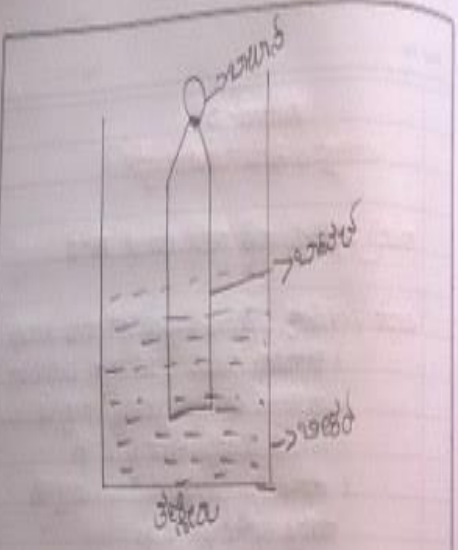

the upward buoyant force that is exerted on a body immersed in a fluid, whether fully or partially submerged, is equal to the weight of the fluid that the body displaces.

Mathematically,  
 $F_b = \rho_f V_d g$   
 where  $F_b$  is the buoyant force,  $\rho_f$  is the density of the fluid,  $V_d$  is the volume of fluid displaced, and  $g$  is the acceleration due to gravity.

Conclusion: The buoyant force is equal to the weight of the displaced fluid.
